HARI HARA SUDHARSAN J

hari-hara-sudharsan   sudharsanj008@gmail.com   +91 6385655433   Hari - LinkedIn

EDUCATION:

Chennai Institute Of Technology B.Tech Information Technology   Sep 2024 – May 2028
- **CGPA:** 9.1/10 – **Coursework:** Software Engineering, Computational Theory, Web Frameworks, Database Management Systems (DBMS), Operating Systems, Networking, Algorithms, Algorithm Design, Fundamentals of Management

PROFESSIONAL EXPERIENCE:

Kurinji Technologies | Salesforce Developer Trainee
June 2025 – July 2025
- Developed and deployed Salesforce applications using **Apex, Visualforce, Lightning Components, and Workflow Rules**; automated business processes and managed **user roles, permissions, and data security**.
- Gained hands-on experience in **Salesforce CRM** and platform administration; completed development courses and integrated **external APIs** to enhance skills in declarative automation and **Apex coding**.

Trinity Intelligence & Automation | Co-Founder & Tech Lead
Sep 2025 – Present
- Launched an agency providing **AI-powered automation tools** for business process improvement.
- Designing **web platforms, API integrations, and AI workflows** to boost efficiency and reduce manual work.

PROJECTS:

Latros HealthCare-Bot | *AI,React.js, Node.js, Express.js, Supabase, Prisma*   github.com/latros
- **Latros HealthCare Bot (2025):** Developed a desktop healthcare chatbot providing symptom analysis, health guidance, and doctor suggestions, using Python NLP libraries, **React** frontend, **Node.js/Express** backend, and **Supabase/Prisma** database.

AI chat App| *React.js, Node.js, API*   github.com/AI-Bot
- Developed a real-time chat app supporting hundreds of users with fast message delivery and chat history saving.
- Added offline message support and auto reconnect so users don't lose chats even with poor internet.

SafeMint | *Next.js, Node.js, Express, Solidity, Ether.js*   github.com/internproject1
- Built an Token Creation platform integrating QIEDex, **Rug Proof**, and Liquidity Locking to improve Safe and Fair Launch of Token.

Coding Proficiency:

- **Leetcode:** Solved 630+ problems, Achieved over 1535 contest rating, ranked top 50% globally. .
- **Codechef:** Achieved a contest rating of 1200+ and solved over 300 pbms, demonstrating strong proficiency in Data Structures and algorithms.
- **SkillRack & CodingNinjas:** Solved 1100+ programming problems, demonstrating coding proficiency and consistency.

Achievements:

- **Zinnovatio 2025-Finalist:**Proposed a solution for air pollution by cloud seeding using AI.
- **DigiGreen Hackathon:Top 50/500** Suggested a solution to solve environment problems.
- **MSME National Level Hackathon: Shortlisted** among top teams in college for innovative tech solution proposal.
- **Mumbai Hacks Hackathon: Shortlisted (top 14%)** among top teams for innovative tech solution proposal.

Technical Skills:

- **Languages:** JAVA, SQL, JavaScript, Python, HTML, CSS, Tailwind CSS, C, C++
- **Web-Framework:** React.js, Node JS, Express.js, Rest, Fast, Vite.
- **Software:** Git and Github, Docker,VS Code, PostMan.
- **Database and Cloud:** MongoDB, FireBase, MySQL, Supabase, Prisma.
- **AI:** ML, DL, NLP, Neural Networks, TensorFlow, PyTorch, google colab, Hugging Face Transformers.

Certifications:

- Introduction to Cyber Security
- Introduction to IOT
- Eduskills Google-AIML
- Cisco Packet Tracer
- CodingNinjas ML, Java, HTML, CSS
- Eduskills Rapidminer-Data Science
- Introduction to MongoDB
- IBM-AI Fundamentals
- Data Engineering Mastery
- Blockchain Basics
- Machine Learning - Interm
- Platform Engineering

Competitions:

- **Hackathon Participation:** Actively participate in hackathons to build projects, explore new technologies, and solve real-world problems.
- **Zinnovatio Hackathon:** Shortlisted For the Final Round Among 3500 we ranked under 200th place.
- **Baseline Safety Solution:** Developed a solution that helps developers avoid unsafe baseline features and build applications more securely And Secured Top 10% .
